...your partner for supplying your pathology laboratory needs in histopathology, histology, microbiology, haematology, clinical chemistry, immunology, molecular diagnostics and more... Recognising the speed, accuracy and volume throughput pressures today’s pathology laboratory staff have to cope with for both routine and specialised medical laboratory testing, this application guide is intended for you to view the breadth of quality products available from a single source.

Fisher Scientific has over 100 years experience in serving the needs of the scientific community through product choice and service innovation.

**Why buy from Fisher Scientific?**

- Competitively priced products
- A comprehensive product range from chemicals, consumables, equipment, and apparatus
- Products selected specifically for the pathology laboratory
- A dedicated Technical Support service

And much, much more...

**Why not try us?** Please ask for a quote for any of your needs.

All products are for research use only unless otherwise indicated.
We know one of the keys to a good catalogue is ease of use. With this in mind the catalogue has been designed to help you find the right product quickly and easily.

- Cell culture
- Microbiology
- Cloning and expression
- DNA Amplification
- Nucleic acid purification
- Immunohemistry
- Protein purification
- Electrophoresis, blotting & immunodetection
- Protein labeling and detection
- Histology
- BioReagents

**HISTOLOGY:**
Includes all the histology items that have applications within both routine histology/pathology laboratories and research environments alike.

**MICROBIOLOGY:**
All aspects of bacterial cell growth and handling from media and reagents to plastics and equipment.

**HAEMATOLOGY:**
Applications and products for general haematology, blood banks, coagulation & haemostasis.

**CLINICAL BIOCHEMISTRY:**
This section covers a full range of equipment and consumables for the clinical biochemistry sample testing of blood, urine, faeces, CSF and stoma/drain fluid.

**MOLECULAR DIAGNOSTICS:**
A comprehensive range of Fisher BioReagents for a broad spectrum of biomedical and molecular biology research and testing procedures.

Order your Fisher Scientific catalogue by:
Tel: 1-800-234-7437
Email: katie.delaney@thermofisher.com
On-line: www.fishersci.ca
The complete Fisher Scientific range covers over 350,000 product lines. Our team of highly qualified, experienced product specialists has selected products from this broad range to give a comprehensive choice of brands and manufacturers specific to the pathology laboratory.

Here are some good reasons to visit our site...

- Full access to our range of products with the ability to search, select and purchase items with real time stock availability. If you register, you can view previous orders plus discounted prices specific to your account
- Special offers and promotions specific to your areas of interests
- Technical support and applications
- Downloadable MSDS

Quality you can trust • Brands you know • Service you expect

Quality Brands

We only select world leading brands for our product range. We understand that for you to have the confidence in the tools for your research and testing, you need the right products that will give you consistent results — every time.

Fisher Scientific is part of Thermo

Fisher Scientific — the world leader in serving science. This enables us to attract the best brands. You can be assured of finding the names you know and trust.

Fisherbrand is our own labelled range of products. Being part of a global company enables us to source products at competitive prices allowing us to pass the savings on to you, without any compromise in quality. Fisherbrand products offer quality, reliability and value for money ensuring you have real choice when making a product decision.

Service You Expect

Our product range is only part of the story. You can be assured that you will receive service second to none...

- Huge warehouse space ensures high product availability
- The latest inventory technology means you receive the products you need when you need them
- An experienced Customer Service Team dedicated to making your contact with Fisher Scientific easy and efficient
- A large, highly experienced field sales force to advise and guide you in your product choices
- A website to give you the best on-line information
- Technical support from a highly qualified and experienced team of specialists
- Promotions and offers for the best value for money

Fisher Scientific and the Environment

For many years, Fisher Scientific has taken action to reduce the company’s impact on the environment. Our concern for the environment is driven by a desire to improve efficiency, to conform to legislation and to be an environmentally responsible company.

Our goal now is to focus on continual improvement. Simple actions taken together will bring about many environmental benefits. We encourage our staff, our customers and everyone involved in Fisher Scientific to play their part in this process.
GE Healthcare Life Sciences, including Whatman™, is working with us to provide you with broader solutions for your research needs, while ensuring that you are working with the best and most innovative tools possible.

Thermo Scientific Finzymes advanced PCR enzymes including:
- Phusion® High-Fidelity and new Hot-Start II polymerase reagents
- Phire® Hot-Start PCR reagents
- Direct PCR kits for plant, blood, tissue and FFPE sections

Thermo Scientific Anatomical Pathology products are renowned throughout the industry for their innovation, quality and attention to user and specimen safety. Bringing together the knowledge and experience of several prestigious legacy brands, the Thermo Scientific product portfolio is the source you can trust.

BD Diagnostics Preanalytical Systems is the industry pioneer and leader in the area of modern evacuated blood collection systems, including evacuated tubes and needles, including the BD Vacutainer® and Microtainer® Brand and families of products in venous, capillary and urine collection, transfer and transport.

Fisher Scientific www.fishersci.ca has more than 50,000 antibodies to choose from - but you only need one. Our antibodies search engine allows you to select the right antibody for your research by narrowing your search based on your specific requirements, including reactivity, host or research application.

Thermo Scientific Oxoid Prepared Media are used for the isolation, identification, differentiation, and susceptibility testing of microorganisms from clinical specimens. Plated media are available in multiple formats including monoplates, biplates, triplates, and quadplates. A wide range of broths and agars are available in tubes, in a variety of tube sizes and fill volumes for greater testing flexibility.
Histology

### Consumables
- **Cassettes** - Thermo Scientific, Fisherbrand, Simport
- **Moulds** - Thermo Scientific
- **Media** - Thermo Scientific
- **Waxes** - Thermo Scientific, Fisher Chemical

### Automated Label
- **Fine Cutting kit** - Thermo Scientific

### Grossing
- **Embedding workstation** - Thermo Scientific
- **Embedding media** - Thermo Scientific, Fisher BioReagents, M'Cormick Scientific
- **Embedding waxes** - Thermo Scientific
- **Forceps** - Fisherbrand
- **Cold plates** - Thermo Scientific

### Processing
- **Thermo Scientific**

### Sectioning
- **Microscopes** - Fisher Scientific, Zeiss
- **Slides/Coverslips** - Fisherbrand, Thermo Scientific

### Slide Printing
- **Cabinets** - Thermo Scientific, Fisherbrand
**Scalpels and accessories** - Thermo Scientific, Fisherbrand, Feather

**Sample containers** - Thermo Scientific

**Cassette Labellers** - Thermo Scientific

**Cytospin** - Thermo Scientific

**Centrifuges** - Thermo Scientific, Fisher Scientific, Eppendorf

**Reagent alcohol** - Thermo Scientific, Fisher Chemical, Fisher BioReagents

**Solvents** - Thermo Scientific, Fisher BioReagents

**Microtomes/Cryostats** - Thermo Scientific

**Water baths** - Thermo Scientific, Fisherbrand, Fisher Scientific Isotemp

**CryoSpray** - Thermo Scientific, Fisherbrand

**Stains / Reagents** - Thermo Scientific, Fisherband, Fisher Scientific SureStain

**Vessels** - Thermo Scientific, Wheaton

**IHC autostainers** - Thermo Scientific
Microbiology

Media
- Ready to use - Thermo Scientific
- Classical

Microbiology consumables
- Incubation - Thermo Scientific
- Culturing vessels
- Sampling
- Inoculating loops
- Swabs - Puritan
- Safety Cabinets

Incubators - Thermo Scientific Forma
Safety cabinets - Thermo Scientific, UVP
Pipettors - Thermo Scientific, Fisherbrand, Eppendorf
Spiral platers - WASP
Inoculation loops, spreaders - Fisherbrand, Thermo Scientific Nunc
Aseptic technique: Burners - Thermo Scientific
Anaerobic jars & packs - Thermo Scientific Oxoid
Culturing Vessels - Corning, Thermo Scientific Nunc
Swabs - Fisherbrand

Filtration
- Filtration devices
- Filter holders
- Air sampling

Filtration Devices - EMD Millipore, Thermo Scientific Nalgene, GE Whatman
Filtration Membranes & Dispensers - EMD Millipore, GE Whatman, Thermo Scientific Nalgene
Filter Holders - EMD Millipore, GE Whatman, Thermo Scientific Nalgene, Sartorius
Air Sampling - Thermo Scientific Oxoid, EMD Millipore, Sartorius

Microbiology equipment
- Colony counting
- Disposal
- Shakers

Bacterial identification
- Test kits
- Antisera
- Antibiotics
- Reference organisms

Staining reagents
- Thermo Scientific, Fisherbrand, Fisher Scientific SureStain
Microscopy - Fisherbrand, Zeiss
Staining kits - Thermo Scientific
Bottles - Thermo Scientific Nalgene

Staining reagents

Protein Purification
Media and Supplements - Thermo Scientific Oxoid, Fisher BioReagents, BD

Balances and weigh boats - Fisherbrand, METTLER TOLEDO, Sartorius, Denver, Ohaus

Autoclave sterilisation - Fisher Scientific SterilElite

Consumables Flasks, petridishes - Corning, Thermo Scientific Nunc, Fisherbrand

Diagnostic kits - Thermo Scientific Oxoid

QC organisms - Thermo Scientific Oxoid

Microscopy & slides - Zeiss, Fisherbrand & Thermo Scientific

Antimicrobial susceptibility discs & strips - Thermo Scientific Oxoid, GE Whatman

Colony counting - ProtoCOL

Autoclaves - Tuttnauer
Full Blood Count
Automation

Delivering results across entire applications

RESULTS offers you an all-inclusive solution across life science and analytical workflows, delivering products and services from sample preparation to data collection to support your research.

As a part of the RESULTS program, Fisher Scientific provides trusted brands in the industry giving you unparalleled product access and technical expertise to the latest scientific innovations to accelerate your research.
